Leadership and Management with Florent Executive courses

University degree - Bigdata Analyst

IUT Paris Descartes

January 2019 to June 2019

The Big Data Analyst University Diploma aims to provide the theoretical and practical knowledge necessary for the use of recent Big Data tools:

- the storage of very large volumes of data in architectures that scale up
- real-time data processing for decision making
- integration of various types of data
- analysis of web data
- data quality management.

PMI-ACP training

globalknowledge

January 2014

This training provides participants with the necessary keys to manage their next Agile project, more adapted to change and innovation. It also prepares them to take the PMI-ACP certification.

This Agile ACP training is a stimulating combination of interaction, active learning and exercises. Each exercise is designed to allow for learning by doing so that what is learned can be applied immediately in the work of each learner.

Cloudera Developer for Apache Hadoop training

globalknowledge

December 2013

This official Cloudera Developer Training for Apache Hadoop provides the key concepts and expertise to build massive data processing applications with Apache Hadoop.

From implementing Workflow to working with APIs via writing MapReduce code and executing joins, Cloudera training is the best preparation for tackling real-world cases encountered by Hadoop developers.

Master of Engineering (Software engineer)

INSAT

2002 to 2007

The objective of this program is to train engineers who master the methods of analysis and management of IT projects as well as the languages and tools of software development.

Graduates of this program acquire the skills and experience to follow and manage all stages of a project's life cycle, enabling them to integrate perfectly into development teams or to assume the role of project manager.
